Professional Summary

Computer Science undergraduate at VIT Vellore with experience in AI-powered software development, agentic AI, Retrieval-Augmented Generation (RAG), LangChain, LangGraph, and MCP Servers. Experienced in building AI agents, backend APIs, and automation workflows using Python, Java, FastAPI, and Gemini API. Strong foundation in Data Structures and Algorithms, REST APIs, software development, and problem solving.

Education

Vellore Institute of Technology (VIT), Vellore	2023 – 2027
<i>Bachelor of Technology in Computer Science and Engineering</i>	<i>Blockchain Technology Specialization / CGPA: 7.95/10</i>
St. Anselm Sr. Sec. School	2021 – 2022
<i>Senior Secondary Education (XII)</i>	<i>83.4%</i>
St. Anselm Sr. Sec. School	2019 – 2020
<i>Secondary Education (X)</i>	<i>82.8%</i>

Experience

Pratham Software Pvt. Ltd. (PSI), Jaipur	May 2026 – Jul. 2026
<i>AI Engineering Intern</i>	<i>Artificial Intelligence & Python Engineering</i>
- Designed and developed LLM-powered agentic AI workflows to automate multi-step user requests and operational tasks. - Built modular backend components for context retrieval, tool selection, and structured workflow execution using APIs and external integrations. - Developed and tested AI-agent prototypes that converted natural-language inputs into reliable, action-oriented outputs. - Improved agent reliability by refining prompts, workflow logic, and tool-integration handling across representative use cases. - Documented system architecture, workflow behavior, and implementation decisions for the development team.	

Selected Projects

IRA – Intelligent AI Workspace Agent	<i>LangChain, LangGraph, MCP, FastAPI</i>
- Developed an AI-powered workspace assistant that translates natural-language requests into automated workflows across Gmail, Google Drive, and Google Calendar. - Built multi-agent workflows using RAG and MCP for contextual retrieval, tool selection, and reliable execution of external actions. - Integrated Google Workspace APIs with FastAPI backend services for email management, document retrieval, and calendar scheduling.	
Gesture OS – AI-Based Hand Gesture Control System	<i>Python, OpenCV, MediaPipe, PyAutoGUI</i>
- Developed a real-time computer vision system enabling touch-free computer interaction through hand gestures. - Automated mouse control, scrolling, volume adjustment, screenshots, and application shortcuts using gesture recognition. - Optimized gesture detection for low-latency real-time interaction using camera-based input.	
AI-Powered Resume Analyzer	<i>Python, LangChain, RAG, Gemini API, NLP</i>
- Built an AI system to evaluate resumes against job descriptions using RAG-based semantic analysis and LangChain. - Implemented ATS-style scoring, keyword matching, and skill-gap analysis to assess candidate–job alignment. - Integrated Gemini API to generate personalized resume recommendations and interview preparation guidance.	

Leadership & Activities

State Coordinator – Aikya, VIT Vellore
Led and coordinated the Rajasthan state team for a university-wide cultural performance, managing team coordination, practice schedules, and performance preparation.
Event Organizer – Capture The Cube, Gravitas
Contributed to organizing a cryptography-based puzzle-solving competition, assisting with encrypted puzzle design and event execution.
National Cadet Corps (NCC) – Cadet
Participated in structured training focused on discipline, teamwork, leadership, and responsibility.

Technical Skills

Programming: Java, Python, C++, C, JavaScript
AI & Generative AI: LangChain, LangGraph, RAG, AI Agents, MCP, FastMCP, Gemini API, Hugging Face, Prompt Engineering
Development: FastAPI, REST APIs, React.js, HTML, CSS
Databases: PostgreSQL, MySQL, MongoDB
Tools: Git, GitHub, Docker, Postman, Linux, VS Code
Core: Data Structures & Algorithms, OOP, SQL, SDLC, Blockchain Fundamentals
